| | |
|------|---|
| NOTE | *12 To playback HDR, a HDR source is required (H.264 or H.265(ST2084 or HLG format)). |
| NOTE | *13 All models: Supporting HDR does not increase the peak brightness capabilities of the TV panel. |
| NOTE | Full HD & HD models: The ability to send a non 4K HDR signal via HDMI depends fully on the playback device. The majority of 4K Blu-ray discs require HDCP2.2 on TV to play back HDR, whereas the HDMI input on this TV support only HDCP1.4; accordingly not all HDR contents are guaranteed to be enjoyed on the TV. |
| NOTE | *14 Internet apps are provided by their respective service providers, and may be changed, interrupted, or discontinued at any time. Panasonic assumes no responsibility and makes no warranty for the availability or the continuity of the services. |
| NOTE | *15 When a Bluetooth device is connected to the TV, it is possible that the Bluetooth audio output may not be synchronized (i.e. be delayed) with relation to the images on the screen. This is not a defect of the TV or the device. The delay time will differ depending on the device. |
